

AUTISM AWARENESS SERIES

The Spectrum Isn't a Line

A different configuration, not a dial

#1 — What Is the Spectrum?

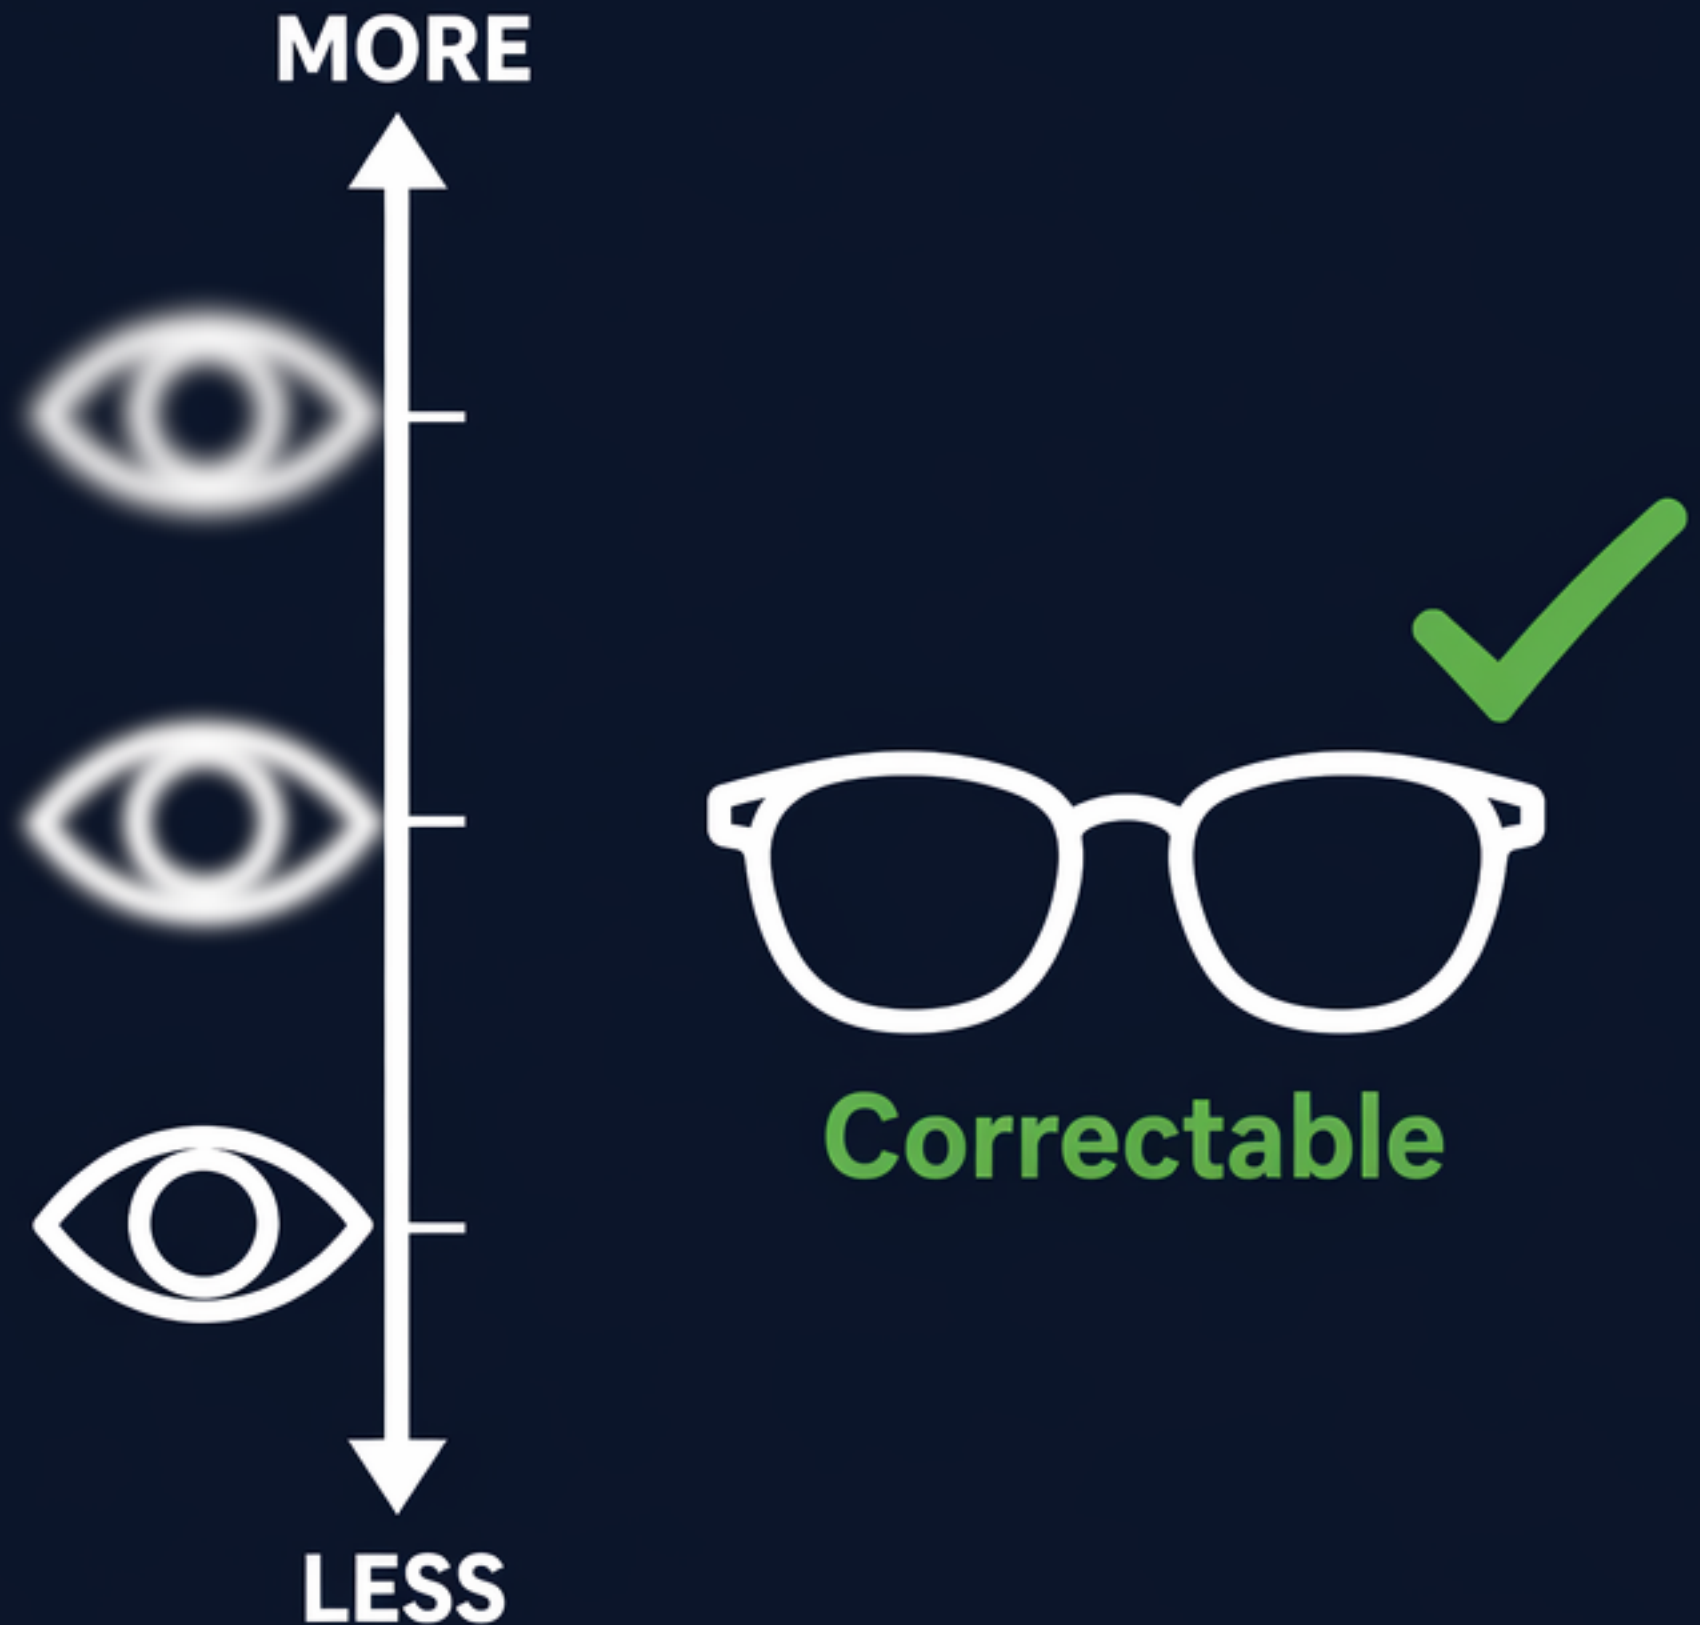

raphink.info/autism

Most people picture a line.
That's not what the spectrum means.

MYOPIA

A vertical spectrum — more or less of the same thing.

Myopia exists on a scale.

More blur. Less blur. Fixable.

COLOR BLINDNESS

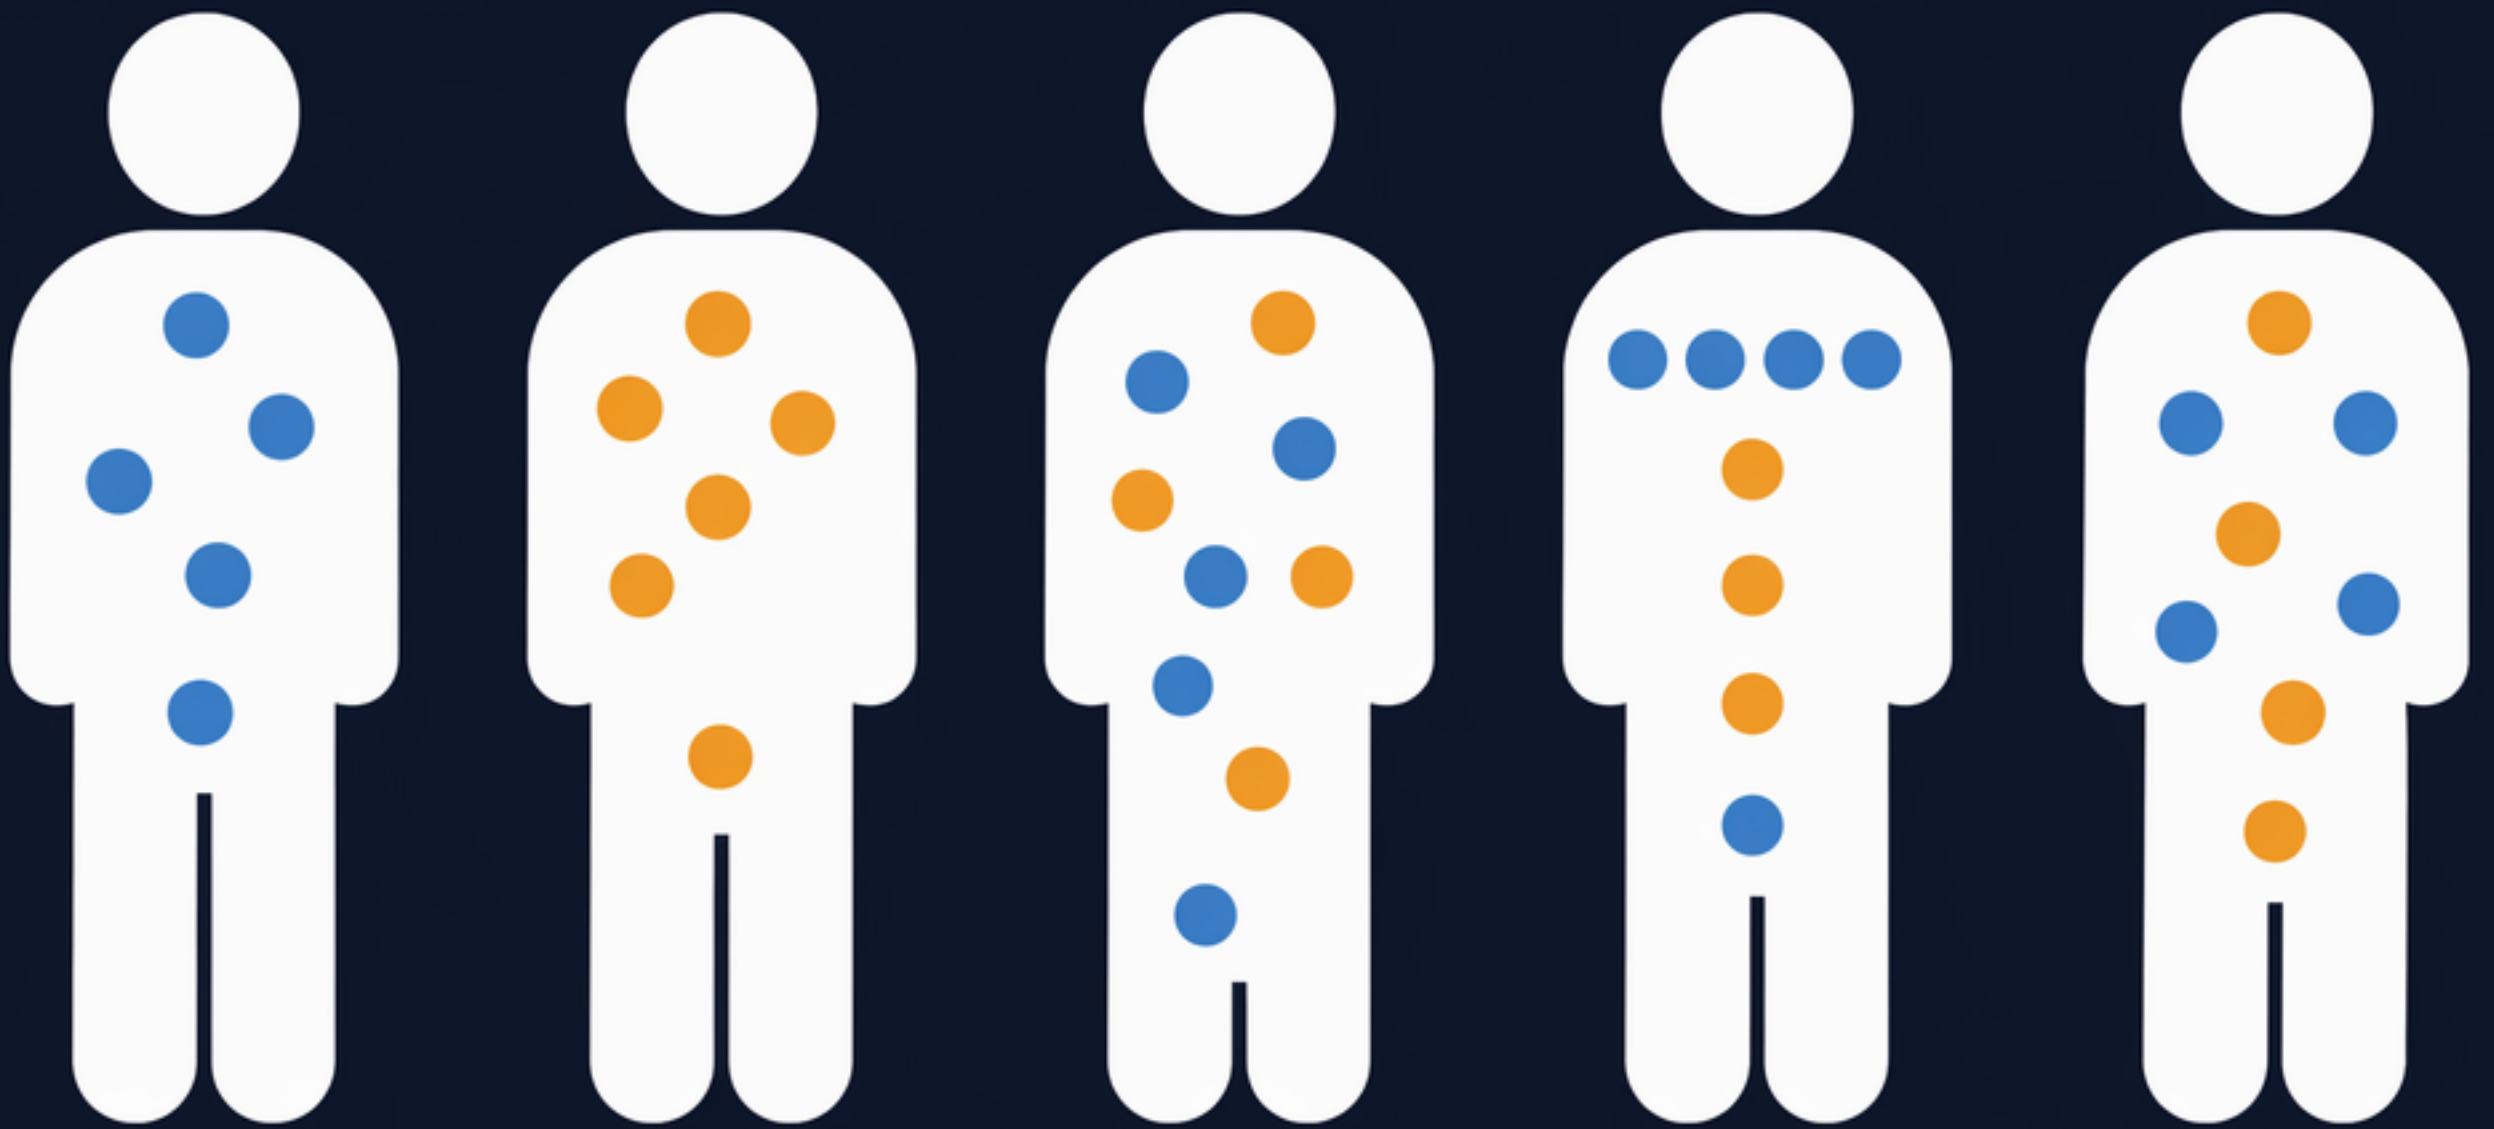

A horizontal spectrum — different configurations.

Not correctable. Only compensable.

Color blindness isn't more or less vision.
It's a different configuration entirely.

THE AUTISM SPECTRUM

Not more or less autistic.
Different neurological configurations.

MYOPIA:
Correctable

AUTISM:
Not correctable

Only compensable
strategies, workarounds,
adaptations

You can learn workarounds.
You're not fixing the wiring.

Not a dial.

A different way of seeing.
