

AUTISM AWARENESS SERIES

Rest Is Not What You Think

It's not about quiet. It's about novelty.

#6 — Rest & Recovery

raphink.info/autism

ENERGY

ENERGY

Quiet isn't always rest.

**For autistic people, it depends
on what's in the quiet.**

THE COMMON MODEL

Less stimulation = more rest.
That's not how it works for everyone.

THE ACTUAL VARIABLE

It's not about noise level.
It's about novelty load.

**Quiet. Unfamiliar.
Draining.**

**Loud. Predictable.
Restorative.**

The paradox of autistic rest.

Context matters more than volume.

Rest = low novelty demand.
Not necessarily low stimulation.

Rest isn't stillness.
It's the absence of novelty.
